

2017 CORE ELOS Extended Learning Opportunity Summer Program

Middle School Mathematics Activities

The 2017 Extended Learning Opportunity Summer (ELOS) Program provides middle school math teachers engaging activities to use with their students. Each teacher is to receive one Middle School Math Activities Teacher Packet. Each packet includes ten (10) different math activities to choose from, complete with teacher directions and student copies. Activities may be used in grades 6-8 in any order. These lessons are supplemental and may not *replace* the ELOS math curriculum. Teachers will receive specific information about implementing the Math Activities during their ELOS professional development.

Thank you for organizing the above materials for each ELOS Math teacher. We look forward to an exciting summer in our middle school math classrooms!

The following special materials to implement the Math Activities will arrive from the LAUSD Stores Warehouse. **Each ELOS Math Teacher is to receive:**

- 1 Storage File Box (Construct the box and fill with the items below.)
- 1 package Plastic Containers (100 per pkg.)
